IMPORTANT INFORMATION REGARDING WATER METER INSTALLATIONS

Dear Homeowner:

A WATER METER is now required in every home and business in the Township of Ignace. We must all do what we can to conserve water. For this reason we are implementing a universal water-metering program. This is a mandatory program as per the Township of Ignace By-law. Around 700 hundred water meters will be installed throughout the Township of Ignace.

The Township of Ignace has contracted Neptune Technology Group to install the meters. Installations will begin mid July 2017 for about 6 weeks.

The Installation Process

As we get closer to the start of this project, you will receive a booklet prompting you to book an appointment. ***The booklet explains all you need to know about scheduling your appointment and other details of the program.*** When you receive this booklet, you will have two weeks to schedule an appointment. Please do not call until you receive this booklet. If you are a tenant, please contact the building owner when you receive the information booklet.

Quick and Convenient

Meter installation appointments can be made to fit your schedule. The installation usually takes about 1½ hours and the installer cleans up afterwards. In order to maintain the installation schedule, it is imperative that you book your appointment within two weeks of receiving your information kit. For more details, please visit www.town.ignace.on.ca .

The Water Metering Program is an important part of the process to ensure equitable billing for all residents in Township of Ignace. We look forward to your support and co-operation to make this program a success.
